ParentDocket

Calm, documented co-parenting for families & the professionals who support them

INFORMATION PACKET FOR ORGANIZATIONS

Web at parentdocket.com · iPhone · Android

1 OVERVIEW & MISSION

One affordable place to keep co-parenting calm and on the record

ParentDocket gives separated and divorced parents a structured place to communicate, manage custody schedules, split children's expenses, and export verifiable records. Parents can also invite their counselor, mediator, attorney, or family resource staff so everyone supporting the family works from the same information.

Only One Parent Has to Pay
One subscription covers both parents; the second parent is always free.

Built for Lower Conflict
Optional Tone Check helps parents pause and reword heated drafts before sending.

FOUNDER'S STORY & MISSION

"I went through a rough divorce. In the middle of it, I wished I had one app that could do everything we needed: keep communication calm and on the record, track the custody schedule, split the kids' expenses, and give the court something it could trust. The tools that did this cost each parent a lot, every single year. So I built the app I wish I'd had, at a price a family can actually afford. Our mission is simple: no family should go without a safe, documented way to co-parent because of cost."

— John Shoufler, Founder

Complete Co-Parenting Workspace:

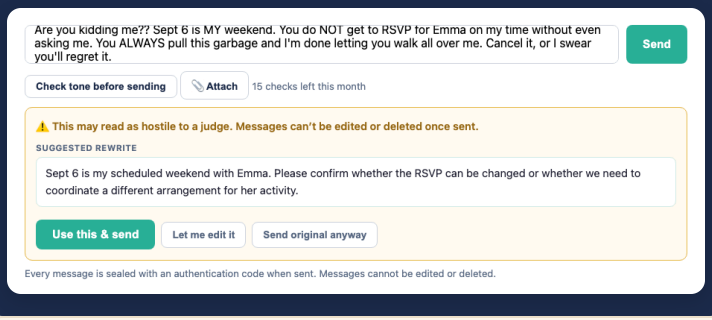

Messages · Children · Custody · Expenses · Documents · Journal · Certified Record · Professionals · Settings

2 FEATURES & MAIN FUNCTIONS

Tone Check: Calm Communication Before Sending

FEATURED TOOL

Optional AI review flags hostile or heated wording before a message is sent and suggests a calmer, more formal rewrite. The parent always chooses: **Use this & send**, **Let me edit it**, or **Send original anyway**.

Certified Messaging
Every message is sealed and timestamped when sent, carries an authentication code, and cannot be edited or deleted by anyone.

Custody Calendar & Order Upload
Manage schedules, swap requests, and check-ins with a full history of who asked for each change and who approved it. Upload a custody order and the app builds the calendar.

Shared Expenses
Log expenses with receipts, calculate automatic splits, and accept, dispute, or settle up with a clear paper trail.

Children Profiles, Info Bank, Documents & Journal
Keep medical details, school info, important contacts, shared documents, and parenting journal entries organized in one place.

Certified PDF Export & Provider Access
One-tap, court-ready PDF record with every timestamp and authentication code, integrity verified at export. Optional consent-based read access for family professionals.

3 HOW PARENTDOCKET SUPPORTS CO-PARENTING, CUSTODY & COMMUNICATION

High-conflict co-parenting often escalates over unclear schedules, disputed texts, and unpaid receipts. ParentDocket replaces scattered texts with structured tools that keep parents focused on their children:

Accountable Messaging
Sealed timestamps and authentication codes remove "he-said, she-said" disputes over what was written.

Predictable Custody
Visual parenting-time splits and documented swap requests prevent last-minute misunderstandings.

Transparent Finances
Clear split percentages, attached receipts, and payment status tracking keep money talks factual.

Verified Records
Download a Certified PDF anytime with integrity verified at export for mediators, counselors, or court.

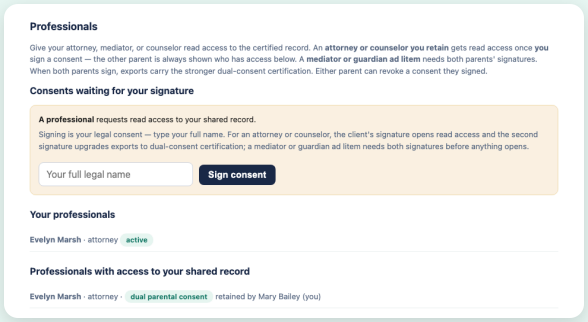

4 AVAILABLE TO NONPROFITS & FAMILY RESOURCE CENTERS

YES Built for Family Resource Centers, Counselors & Mediators

Yes. ParentDocket works with nonprofits, family resource centers, counselors, mediators and attorneys, and the professional account for your organization is free. Parents can give their counselor, mediator, attorney, or family resource staff access so everyone supporting the family works from the same information and communication is easier.

Clear Consent Rules
A professional a parent works with gets read access once that parent signs a consent; neutral roles like mediators need both parents' signatures.

Full Transparency for Parents
The other parent always sees who has access, and either parent can revoke a consent they signed at any time.

5 COST, FAMILY PLANS & ORGANIZATION PARTNERSHIP

Simple, Family-First Pricing

One flat price covers the whole family on Web, iPhone, and Android.

$9.99/month or $99.99/year
Includes a 7-day free trial

Only one parent has to pay.
One subscription covers both parents; the second parent is always free. This is deliberate, to remove the barriers to using the app — if one parent can't or won't pay, the family can still use it.

Published Price Comparison

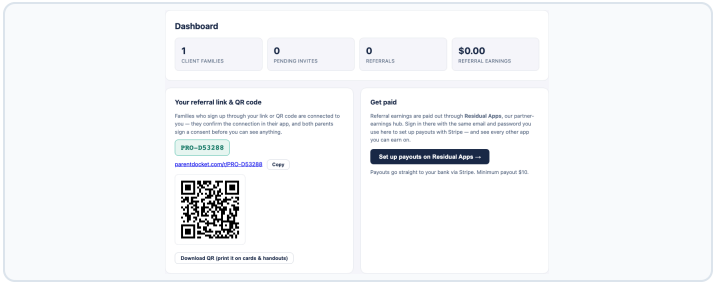

Service	Annual Cost	Second Parent
ParentDocket	**$99.99 / family / year**	**Always Free**
OurFamilyWizard	$99–$199 / parent / year	Pays separately

Partner With Us — Free Organization Portal

Every organization receives a **free professional account** with your own referral link and printable QR code for handouts, plus a live dashboard showing connected client families, pending invites, referrals, and earnings.

Option A: Earn 25% Revenue Share
Earn **25% of every subscription payment** from families you refer, including renewals — the same rate we pay all of our partners. Payouts to your bank via Stripe.

Option B: Or Pass It On
Instead of the commission, we can set your QR code to give your families a discount on their subscription.

Payouts are handled through Residual Apps, our partner-earnings hub (minimum payout $10; the hub keeps a 20% platform fee on earnings, capped at $9.99/month). No cost to join, no contract.

6 QUESTIONS & SUPPORT

Questions? Text me directly

Setting up your free organization portal, printing QR handouts for families, or a question about how provider access works. Whatever comes up for you and your team or the families you serve, including any issue with the app, just text me and I'll help.
